

**CropBioLife is a plant foliar spray that boosts plant and soil health.**

CropBioLife is a 100 % Natural Flavonoid- Based Spray, Developed from Naturally Occurring Bitter-Orange Extract. **This Application Data Sheet Contains an Overview of CropBioLife Application on Wheat Crops – Including What to Expect, Results, and Spray Rates.**

- Increases Number of Tillers per Plants
- Increases Leaf Area
- Increases Nutritional Values in Wheat
- Increases Rate of Photosynthesis
- Increases Overall Yield
- Tolerance for Disease & Pest
- Increase Protein Percentage
- Improve Root Biomass
- Increase Soil Organic Carbon
- Improves Overall Health of the Plant
- Improves Soil Biology

## Documented Experiences:

The table below shows experiences that our customers had in which improvements were seen in key Wheat crop parameters following the application of CropBioLife for one season.

*\*Experiences may vary. 'Documented experiences' refers to independent laboratory testing that was completed following the harvest with our customers. These increases vary according to the crop type.*

Growth/Yield Parameters	Enhancement in % *
Overall Yield	15-25%
No. Tillers per Plant	10-15%
No. of Grains per Tiller	10-15%
Soil Organic Carbon	35-40%

## Spray Application:

Crop	Dose Per Acre	1st Application	2nd Application	3rd Application
<b>Wheat</b> 	400ml per Acre 	15-29 Days After Sowing	41-49 Days After Sowing	Spray 28 Days Later
